COTTON

Briefs made from pure stretch cotton for natural contact with the skin, exceptional comfort and effective support and control.

Post-partum Briefs

These briefs are specifically designed to facilitate recovery of abdominal muscle tone, compromised by pregnancy; while its special shape helps buttocks and abdomen to regain correct muscle tone.

The pressure on the waist is designed to have a slimming effect, to regain a pleasing appearance.

The high percentage of cotton, combined with the lack of seams, avoids irritation and ensures perfect breathability and oxygenation of the skin, which can therefore return to its former softness and elasticity.
